

PHYSICAL SECURITY CHECKLIST

	TASK	COMPLETED
Physical Locks		
	Use robust door locks and window security for your home/office.	
IoT Devices		
	List all cameras, smart speakers, etc. (use the inventory template)	
	Change factory usernames/passwords for cameras, doorbells, thermostats.	
	Regularly update device firmware (cameras, smart hubs, etc.).	
	Regularly test alarm systems and other security measures.	
	Use official apps for IoT control. Be suspicious of third-party apps.	
	Place IoT devices on a separate network to minimize risk.	
	Enable logging on devices when possible.	
	Enable encryption (if available), restrict remote access, and change default ports.	
Physical Access		
	Restrict physical access to home routers and networking equipment.	
	Secure important documents in locked storage.	
	Dispose of sensitive documents securely (shredding).	
	Protect physical devices from theft or unauthorized use.	
Device Removal / Disposal		
	Securely wipe/destroy old hardware before disposal.
